

Subject Index to Volume 29

A

- Acetamidoinodiacetic acid, decrease in contraction and calcium current with, cardiac muscle, C900
- Acetylcholine, excitation-calcium-contraction coupling, intact smooth muscle, C917
- Acidification, potassium-hydrogen exchange and, corneal epithelium, C618
- Acidosis, hypercapnic, force in skeletal muscle, C805
- Aconitase, mitochondrial function and, hepatocytes, C910
- Acridine orange, calcium oscillations and, gastric parietal cells, C67
- Actin
 - hypertrophy and its reversal, smooth muscle, C1085
 - myofilament overlap, red and white muscle (carp), C283
- Adenine nucleotides, metabolic responses, 10-Hz stimulation, fast-twitch muscle, C832
- Adenosine
 - cAMP production and, medullary thick limb cells, C143
 - free intracellular, cardiomyocytes, C708
- Adenosine monophosphate, cyclic
 - apical sodium and cation channel stimulation by, urinary bladder (toad), C234
 - chloride channels activated by, oocytes, C664
 - chloride ion secretion and, rectal gland cells (shark), C824
 - isoproterenol effects, vascular smooth muscle cells, C492
 - miniglucon effects, positive inotropic effects of glucagon, heart (chick), C993
 - production, adenosine effects, medullary thick limb cells, C143
 - protein kinase dependent on, renal epithelial cell properties, C1290
 - vasopressin and, single amiloride-blockable sodium channels, C1071
- Adenosine triphosphate
 - catabolism, fructose load, transgenic liver, C1191
 - changes induced by, calcium ions and membrane currents, atrial myocytes, C673
 - extracellular, activation of sodium, inorganic phosphate, and calcium transport, myocytes, C1182
 - glucose transport and, skeletal muscle, C555
 - intracellular levels, luciferin-luciferase luminescence and, C176
 - oxygen partial pressure and, cardiomyocytes, C708
 - potassium-chloride cotransport, swelling-activated, C308
 - prolonged hypoxia and reoxygenation, cardiac myocyte response to, adult, C383

- S-Adenosylhomocysteine, oxygen partial pressure and, cardiomyocytes, C708
- Adipocytes, 3T3-L1, insulin-sensitive, glucose transporters expressed in, C570
- Adynamia episodica hereditaria, altered ionic permeability and, skeletal muscle (horse), C926
- Aging, neuromuscular adaptations, cross-reinnervation, C96
- Airway, epithelium, ciliary motility in, ANF inhibition of, C201
- Aldosterone, gluco- and mineralocorticoid receptors, immunolocalization in kidney, C226
- Alkalinization, internal, reversal of anion exchange and, neutrophils, C132
- ALS: *see* Amyotrophic lateral sclerosis
- Amiloride
 - channels sensitive to, cGMP stimulation, urinary bladder (toad), C234
 - distinct epitopes on, C271
 - inhibition, intestinal brush-border sodium-proton exchange (chicken), C1264
 - membrane conductances, TBM cell line, C1172
 - sodium-hydrogen exchange, inner medullary collecting duct, C1300
- Amino acids
 - metabolism, thyroxine-induced left ventricular hypertrophy, C316
 - system A, transport, skeletal muscle, C88
 - transport systems A and ASC, expression during erythroleukemia cell differentiation, C392
- γ -Aminobutyric acid, response induced by, nucleus solitarius neurons, C745
- Amphotericin, water and urea transport, oocyte (toad), C26
- Amylase, release, sodium fluoride-induced, parotid cells, C194
- Amyotrophic lateral sclerosis, IgG from, tubular calcium channels and, skeletal muscle, C1347
- Angiotensin II, cGMP levels and, neuronal cultures, brain, C79
- Anions
 - modulation, erythrocyte potassium-chloride transport (sheep), C503
 - transport, pH regulation of, C132
- Anoxia, damage induced by, kidney tubules, cytosolic calcium role in, C545
- Antidiuretic hormone: *see also* Vasopressin
 - cAMP and, single amiloride-blockable sodium channels, C1071
- Arrhythmias, cardiac, uncoupling by fatty acids, C439
- Atherosclerosis, PDGF-induced DNA synthesis, smooth muscle cells, C721
- ATP: *see* Adenosine triphosphate
- Atrial natriuretic factor
 - cell volume and, atrial and ventricular myocytes, C681
 - ciliary motility and, tracheal epithelium, C201
 - ion channels, cGMP and, urinary bladder (toad), C234
 - receptors: *see* Receptors

- Atrial natriuretic peptide
 - chloride secretion and, rectal gland cells
 - chloride secretion and, rectal gland cells (shark), C1125
 - potassium and chloride secretion stimulated by, distal colon epithelium (pig), C750
 - secretion, calcium ion dependence of, C756
- Atriopeptin, chloride secretion and, rectal gland cells (shark), C1125
- Autoradiography, satellite cells activation, anterior latissimus dorsi muscle (quail), C206

B

- BALB/c 3T3 cells, simultaneous measurement of pH and calcium, SNARF-1 and fura-2, C297
- Barium, length-dependent activation by, cardiac and skeletal muscle, C609
- BAY K 8644, primary action of, calcium release and, coronary artery smooth muscle cells (cow), C763
- BC₃H1 cells, magnesium homeostasis in, epidermal growth factor effects, C1158
- Bicarbonate, carbonic acid, first dissociation constant for, C113
- Bioenergetics, frequency-dependent fatigue, skeletal muscle, C643
- Biomedical research, Sino-American collaboration in, C670
- Bladder: *see* Urinary bladder
- Bombesin, currents induced by, fibroblasts, C701
- Brain
 - α -isoforms of sodium-potassium-ATPase, localization by in situ hybridization, C468
 - natriuretic peptide, potassium and chloride secretion, distal colon (pig), C750
 - neuronal cultures, cGMP levels, angiotensin II effects, C79
- Brain cells, inositol accumulation, volume regulatory, C784
- Bumetanide
 - cell volume and, atrial and ventricular myocytes, C681
 - cell volume regulation and, ventricular myocytes, C122
 - ³H-labeled, binding to kidney membrane, C791
 - potassium and chloride secretion stimulated by, distal colon epithelium (pig), C750

C

- Cadmium, block, contractions, atrial cells, C249
- Caffeine
 - primary action of
 - calcium release and, coronary smooth muscle cells (pig), C771
 - calcium release and, coronary artery smooth muscle cells (cow), C763
 - shortening velocity, arterial smooth muscle cells, C449

- Calcitonin, calcium channels, thyroid C-cell line, C1253
- Calcium
- cellular regulation, heart, diabetes-induced defects in, C1165
 - cGMP effects and, myometrial response, C861
 - cytosolic
 - adenosine effects, medullary thick limb cells, C143
 - concentration, endothelin signal, C982
 - membrane potentials and tension measurement, smooth muscles, C917
 - regulation by prostaglandin and thromboxane, mesangial cells, C159
 - role in anoxia-induced damage, renal tubules, C545
 - dependence, vascular smooth muscle cell shortening velocity, C449
 - dynamics, altered, myocytes from renovascular hypertension, C327
 - intracellular pH and, simultaneous measurement, C297
 - ionized, α -granule release and, platelets, C242
 - mobilization, endothelin-mediated, regulation by isoproterenol, vascular smooth muscle cells, C492
 - oscillations, single gastric parietal cells, C67
 - release
 - endothelin actions, coronary smooth muscle cells (pig), C771
 - endothelin actions, coronary artery smooth muscle cells (cow), C763
 - release and sensitization, calcium channel blockers and, C364
 - stimulation, glucose transport, skeletal muscle, C555
 - transport
 - extracellular ATP activation of, myocytes, C1182
 - ocular lens membrane, C731
- Calcium-ATPase, calcium transport and, ocular lens membrane, C731
- Calcium channel
- inhibition, α_2 -adrenergic and muscarinic receptors, PC-12 cells, C1282
 - ryanodine receptors, malignant hyperthermia-susceptible muscles (pig), C58
- secretory response, chromaffin cells, C851
- tubular, IgG from ALS, skeletal muscle, C1347
- voltage-dependent, endothelin signal and, C982
- voltage-gated, endothelin effects, coronary artery (cow), C763
- Calcium channel blockers, G protein pharmacomechanical coupling, C364
- Calcium current
- citrate effects, cardiac muscle, C900
 - cytosolic calcium relations, gastric smooth muscle cells, C1012
 - multiple, thyroid C-cell line, C1253
 - norepinephrine-reduced reduction, smooth muscle cells, vas deferens (guinea pig), C17
- Calcium ions
- cytosolic, cholinergic stimulation effects, secretory epithelial cell line, C598
 - external concentration, ANP secretion and, atria, C756
 - influx, stimulation by endothelin-1, C1273
 - membrane currents and, ATP-induced changes, atrial myocytes, C673
- Calmodulin antagonists, contractions, vascular smooth muscle (swine), C1224
- cAMP: *see* Adenosine monophosphate, cyclic
- Carbachol
- calcium oscillations and
 - gastric parietal cells, C67
 - secretory epithelial cell line, C598
- Carbonic acid, dissociation constant, value for, C1113
- Cardiac cells: *see also* Cardiomyocytes; Heart cells; Myocytes
- uncoupling, fatty acids, C439
- Cardiolipin, mitochondrial adaptations, denervated muscle, C841
- Cardiomyocytes: Cardiac cells; Heart cells; Myocytes, free intracellular adenosine, oxygen partial pressure and, C708
- Cardiomyopathy, diabetic, cellular calcium regulation defects, C1165
- Catalase, endothelial activity, EDRF release and, C219
- Cation channels, apical, cGMP stimulation of, urinary bladder (toad), C234
- Cations
- divalent, length-dependent activation of cardiac and skeletal muscle, C609
 - transport, high-potassium erythrocytes, C589
- Cell, volume: *see* Volume
- cGMP: *see* Guanosine monophosphate, cyclic
- Chloride
- conductance, calcium/calmodulin-dependent protein kinase II, T84 cells, C877
 - cytosolic, concentration, endothelin signal, C982
 - passive permeability charge, osteoclast ruffled membrane, C1315
 - secretion
 - atrioepithelium stimulation of, rectal gland cells (shark), C1125
 - cholinergic stimulation of secretory epithelial cell line and, C598
- Chloride-bicarbonate exchange
- DIDS inhibition, HL-60 cells, C535
 - internal alkalization and, neutrophils, C132
- Chloride channel
- anion transport proteins, macromolecular conjugates of transport inhibitors, C1094
 - cAMP activation of, oocytes, C664
 - epithelial, regulation by protein phosphatase (shark), C1217
 - histamine-induced, apical membrane, parietal cells, C1000
- Chloride current, GABA response, nucleus solitarius neurons, C745
- Chloride ions, secretion, rectal gland cells (shark), C813, C824
- p-Chloromercuribenzenesulfonate, urea transport and, mutant red blood cells, C778
- Chlorothiazide, cell volume regulation and, ventricular myocytes, C122
- Cholecystokinin, receptor-activated membrane currents and, pancreatic acinar cells, C949
- Cholesterol, membrane fluidity and mononuclear cell attachment, endothelial cells, C43
- Cholinergic stimulation, oscillations of cytosolic calcium and, secretory epithelial cell line, C598
- Chromaffin cells, secretory response in, regulation, C851
- Circulation, renal cortical, ANF receptors in smooth muscle cells, C424
- Citrate, decrease in contractin and calcium current with, cardiac muscle, C900
- Citrate synthase, mRNA, induction by nerve stimulation, C266
- Collagen, turnover, development of left ventricular hypertrophy, C316
- Colon
- distal epithelium, ANP-stimulated potassium and chloride secretion (pig), C750
 - epithelium, chloride conductance, T84 cells, C877
- Colonocytes, ion transport in, intermediary metabolism relations, C626
- Connexin43, gap junction channel characterization, A7r5 vascular smooth muscle cells, C975
- Cornea, epithelium, potassium-hydrogen exchange in, C618
- Coronary artery
- smooth muscle cells
 - endothelin effects on calcium release (cow), C763
 - endothelin effects on calcium release (pig), C771
- Coupling
- electrical, WB cell pairs, liver, C513
 - excitation-calcium-contracting, intact smooth muscles, C917
 - excitation-contraction
 - cadmium and, atrial cells, C249
 - cytosolic calcium, gastric smooth muscle cells, C1012
 - IgG from ALS, skeletal muscle, C1347
 - excitation-secretion, secretory response in chromaffin cells, C851
- Creatine phosphate, glucose transport and, skeletal muscle, C555
- Cromakalim, slow waves and membrane currents with, colonic smooth muscle, C375
- Cross bridge, length-force relations, smooth muscle cells (toad), C1104
- Currents
- membrane
 - ATP-induced changes, atrial myocytes, C673
 - cromakalim and lemakalim effects, colonic smooth muscle, C375
- Cycloheximide, induction of sodium-potassium-ATPase subunit mRNAs, liver cell line, C417
- Cystic fibrosis, cAMP-activated chloride conductance, oocytes, C664
- Cytochrome-c oxidase, mitochondrial adaptations, denervated muscle, C841
- Cytometry, flow, ionized calcium and α -granule release, platelets, C242

D

- Depolymerization, actin, vasopressin and, bladder epithelial cells (toad), C9
- Desmin, hypertrophy and its reversal, smooth muscle, C1085
- Development: *see also* Growth muscle, myosin heavy chain mRNA in (chicken), C1325

Dexamethasone, protein turnover, extracellular pH and, myocytes, C277

Diabetes
changes induced by, RNA in skeletal muscle, C409
non-insulin-dependent, defects in calcium regulation induced by, heart, C1165
sodium-hydrogen exchange and, hepatocytes, C167

Diamox, skin epithelium, ionic acclimation and (toad), C1117

Dicarboxylic acid, transport, intestinal cells (chick), C1151

Diethylpyrocarbonate, potassium-chloride cotransport and, erythrocytes (sheep), C503

Digitonin, calcium oscillations and, gastric parietal cells, C67

Dihydropyridine
binding, myocytes from renovascular hypertension, C327
calcium channels, thyroid C-cell line, C1253
excitation-calcium-contraction coupling, intact smooth muscle, C917

DIDS: *see* 4,4'-Diisothiocyanostilbene-2,2'-disulfonic acid

4,4'-Diisothiocyanostilbene-2,2'-disulfonic acid
chloride-bicarbonate exchange and, sarcolemmal vesicles, vascular smooth muscle, C347
chloride-chloride exchange and, HL-60 cells, C535

Diltiazem, primary action of, calcium release and, coronary smooth muscle cells (pig), C771

Dipicolinic acid, decrease in contraction and calcium current with, cardiac muscle, C900

3,3'-Dipropylthiadiazocyanine, chloride-bicarbonate exchange and, sarcolemmal vesicles, vascular smooth muscle, C347

Disrhythmias, cardiac, uncoupling by fatty acids, C439

E

EDRF: *see* Endothelium-derived relaxing factor

EIPA: *see* Ethylisopropylamiloride

Electroporation, reversible, proteins, living cells, C355

Endocytosis
folate binding protein, proximal tubules, C338
receptor-mediated, epidermal growth factor, hepatocytes, C457

Endothelial cells
membrane fluidity and mononuclear cell attachment, low-density lipoprotein effects, C43
monolayers, barrier function of, norepinephrine and iloprost effects, C1052

Endothelin
calcium mobilization mediated by, isoproterenol regulation, vascular smooth muscle cells, C492
cGMP effects and, myometrial response, C861
primary action of
calcium release, coronary artery smooth muscle cells (pig), C771

calcium release and, coronary artery smooth muscle cells (cow), C763
signal, intracellular ramification of, C982

Endothelin-1, stimulation, calcium ion influx, C1273

Endothelium-derived relaxing factor, release, endothelial superoxide dismutase activity and, C219

Enterocytes, sodium-proton exchange, phorbol ester inhibition of (chicken), C1264

Epidermal growth factor
magnesium homeostasis and, myocytes, C1158
rate constants for, hepatocytes, C457

Epithelial cells
apical localization in, Thy-1 signals for, C715
filter-grown, imaging of, C868
proteoglycan secretion, basement membrane, disruption of microtubules and, C691
renal, cAMP-dependent protein kinase regulation, C1290
urinary bladder, analogue of cytoskeletal protein 4.1 (toad), C1308

Epitrochlear muscle, prolonged incubation, amino acid transport and, C88

Erythrocytes
anion transport proteins, macromolecular conjugates of transport inhibitors, C1094
high-potassium, cation transporters and volume regulation in, C589
mutant, urea transport deficiency in, C778
potassium-chloride transport protein phosphatase role in, C178
swelling-activated, C308
volume set point, anion modulation of (sheep), C503

Erythroleukemia cells, differentiation, amino acid transport systems A and ASC expression during, C392

Ethylisopropylamiloride, pH control mechanisms sensitive to, vascular smooth muscle cell growth and, C581

N-Ethylmaleimide
potassium-chloride cotransport and erythrocytes, C178
erythrocytes (sheep), C503
swelling-activated, C308

Exercise
mitochondrial biogenesis, striated muscle, C266
swimming, sarcomere length changes during (carp), C289

F

F-actin, vasopressin depolymerization of, bladder epithelial cells (toad), C9

Fatigue
fast-twitch muscle, 10-Hz stimulation, C832
skeletal muscle, frequency-dependent, bioenergetics during, C643

Fatty acids, uncoupling, cardiac cells, C439

Fibrinogen, absorption, antibody-detectable changes, C965

Fibroblasts
calcium-activated potassium conductance, bombesin-like peptide effects, C701
ras-transformed, calcium-activated potassium current, C104

rubidium transport, sodium-potassium pump and, C1341

Fluorescence, indo-1, excitation-calcium-contraction coupling, smooth muscle, C917

Fluoride, potassium-chloride cotransport and, C308

Fluoride ions, amylase release, parotid cells, C194

Folate-binding protein, kidney, electron microscope studies, C338

Force-sarcomere length relations, skeletal muscle, thin filament length effects, C1060

Forskolin
barrier function and, endothelial cell monolayers, C1052
cellular electrophysiology and, rectal gland cells (shark), C824

Fructokinase, ATP catabolism, transgenic liver, C1191

Fura-2
calcium oscillations and, gastric parietal cells, C67
calcium transient, ATP-induced, atrial myocytes, C673
cellular calcium regulation, heart, diabetes-induced defects in, C1165
cGMP effects and, myometrial response, C861
microfluorometry
endothelin effects on calcium release, coronary artery (pig), C771
endothelin effects on calcium release, coronary artery (cow), C763
regulation, cytosolic pH, mesangial cells, C159
simultaneous measurement, intracellular pH and calcium, C297

Furosemide
bumetanide binding, kidney membrane, C791
chloride-bicarbonate exchange and, sarcolemmal vesicles, vascular smooth muscle, C347

G

GABA: *see* γ -Aminobutyric acid

Gastric emptying, calcium current, cytosolic calcium relations and, C1012

Gastrocnemius muscle, RNA in, changes induced by diabetes and insulin, C409

Gene expression, myosin isoform, stretched skeletal muscle (chicken), C1325

Glomerular mesangial cells, endothelin signal transduction cascade, C982

Glucagon, processing, positive inotropic effect of, miniglucagon effects (chick), C993

Glucose
modulation of sugar transport, HT-29 cells, C1245
pancreatic β -cell response to, TGF- β effects on insulin secretion, C1046
transport, calcium stimulation of, skeletal muscle, C555
transporters, differential sorting, insulin-sensitive cells, C570

Glutathione redox cycle, EDRF release and, C219

Glycine, dual effect, suprachiasmatic neurons, C213

Glycoproteins, mucin, secretion, sublingual gland model, C1233

- Glycosides, cardiac, cellular volume and, C122
- Glycosyl phosphatidylinositol, apical localization, epithelial cells, C715
- Goblet cells, intestinal, functional biology, C183
- G protein
activity, modulation by phorbol myristate acetate, hepatocytes, C259
- pharmacomechanical coupling, calcium channel blockers and, C364
- tyrosine phosphorylation and oxygen consumption induced by, neutrophils, C1019
- α -Granules, release, ionized calcium and, platelets, C242
- Growth: *see also* Development
- renal, arrest, cAMP-dependent protein kinase and, C1290
- vascular smooth muscle cells
- EIPA-sensitive pH control mechanisms, C581
- sodium-hydrogen exchange and, C562
- Guanosine monophosphate, cyclic
- ANF receptors, renal cortical smooth muscle cells, C424
- apical sodium and cation channel stimulation by, urinary bladder (toad), C234
- levels, angiotensin II effects, neuronal cultures, brain, C79
- miniglucagon effects, positive inotropic effects of glucagon, heart (chick), C993
- myometrial response to, C861
- Guanosine 5'-triphosphate-binding protein, calcium current reduction, smooth muscle cells *vas deferens* (guinea pig), C17
- Guanylate cyclase
- ANF and, ciliary motility, tracheal epithelium, C201
- angiotensin II effects on cGMP and, neuronal cultures, brain, C79

H

Heart

- ANP secretion, calcium ion dependence of, C756
- calcium regulation, non-insulin-dependent diabetes-induced defects in, C1165
- enlargement, collagen turnover and, C316
- free intracellular adenosine, oxygen partial pressure and, C708
- glucagon processing, miniglucagon effects (chick), C993
- rod outer segments, sarcolemma and, sodium-calcium exchangers, C1212
- sodium-calcium exchange, lysophosphatidylcholine and, C433
- tricarboxylic acid cycle, sepsis effects, C50
- Heart atria, ANP secretion, calcium ion dependence of, C756
- Heart cells: *see also* Cardiac cells; Cardiomyocytes; Myocytes
- atrial, isometric contractions, cadmium block of, C249
- embryonic, positive inotropic effects of glucagon (chick), C993
- Heart ventricles, left, hypertrophy, collagen turnover and, C316

- Henderson-Hasselbalch equation, carbonic acid, first dissociation constant for, C113
- Henle's loop, bumetanide binding, corresponding membrane proteins and, C791
- Heparan sulfate proteoglycans, basement membrane, epithelial cells, disruption of microtubules and, C691
- Hepatocytes
- epidermal growth factor analysis, receptor-mediated endocytosis, C457
- G proteins, modulation by phorbol myristate acetate, C259
- mitochondrial respiration of, nitric oxide effects, C910
- sodium-hydrogen exchange in, diabetes effects, C167
- Histamine
- calcium oscillations and, gastric parietal cells, C67
- chloride channels induced by, apical membrane, parietal cells, C1000
- shortening velocity, arterial smooth muscle cells, C449
- HL-60 cells, chloride-chloride exchange, DIDS inhibition, C535
- HT-29 cells
- potassium efflux, calcium-activated, C35
- sugar transport, sodium-coupled, C1245
- Humoral control, gap junction sensitivity, cytoplasmic pH, C1028, C1039
- Hydrogen-ATPase
- passive chloride permeability charge coupled to, osteoclast ruffled membrane, C1315
- sodium-hydrogen exchange, inner medullary collecting duct, C1300
- Hypertension, renovascular, myocytes from, altered calcium dynamics in, C327
- Hypokalemia, decrease, sodium-potassium-ATPase α_2 , heart, muscle, brain, C958
- Hypoxia, prolonged, cardiac myocyte response to, adult, C383

I

- IGF-I: *see* Insulin-like growth factor I
- IgG: *see* Immunoglobulin G
- Iloprost, barrier function and, endothelial cell monolayers, C1052
- Immunoglobulin G, amyotrophic lateral sclerosis, tubular calcium channels and, skeletal muscle, C1347
- Immunolabeling, double gold, isoactin localization, smooth muscle thin filaments, C1332
- Inositol, accumulation, volume regulatory, brain cells, C784
- Inositol trisphosphate, α -adrenergic regulation, cardiac myocytes, C635
- Insulin
- cells sensitive to, glucose transporters expressed in, C570
- IGF-I and, hypertrophy induced by, skeletal myofibers, C475
- protein turnover, extracellular pH and, myocytes, C277
- secretion, TGF- β stimulation of, pancreatic β -cell response to glucose and, C1046
- system A amino acid transport and, skeletal muscle, C88

- treatment, changes in RNA and, skeletal muscle, C409
- Insulin-like growth factor I, insulin and, hypertrophy induced by, skeletal myofibers, C475
- Intestinal cells, succinate transport, sodium-dependent (chick), C1151
- Intestine
- brush-border, sodium-proton exchange, phorbol ester inhibition of (chicken), C1264
- goblet cells, functional biology, C183
- Ionomycin, calcium oscillations and, gastric parietal cells, C67
- Ischemia
- cardiac, tricarboxylic acid cycle and, C50
- damage induced by, kidney tubules, cytosolic calcium role in, C545
- myocardial, uncoupling by fatty acids, C439
- Isoactins, localization, smooth muscle thin filaments, C1332
- Isoforms, platelet-derived growth factor, mitogenic signals for, liver fat-storing cells, C485
- α -Isoform, sodium-potassium-ATPase, localization in kidney, C468
- α_1 -Isoform, abundance, hypokalemia effects, heart, muscle, brain, C958
- Isomyosin, changes, suspended muscle, C528
- Isoproterenol
- barrier function and, endothelial cell monolayers, C1052
- regulation of calcium mobilization, vascular smooth muscle cells, C492

J

- Junction gap
- A7r5 vascular smooth muscle cells, C975
- sensitivity to cytoplasmic pH, humoral factors and, C1028, C1039

K

Kidney

- epithelia, LLC-PK₁, apical vs. basolateral palytoxin, C1201
- gluco- and mineralocorticoid receptors, immunolocalization in, C226
- α -isoforms of sodium-potassium-ATPase, localization by *in situ* hybridization, C468
- membrane, bumetanide binding to, C791
- metabolism, anoxia, cytosolic calcium during, C545
- sodium channels, antidiuretic hormone and, C1071
- tissue culture, proximal tubular reabsorption of inorganic phosphate, C885
- Kidney cells, apical localization in, Thy-1 signals for, C715
- Kidney medulla
- inner collecting duct, sodium-hydrogen exchanger, C1300
- thick limb cells, adenosine effects on cAMP production, C143
- Kidney tubules
- anoxia-induced damage, cytosolic calcium role in, C545
- collecting, plasma membrane fluidity in, C1

- gluco- and mineralocorticoid receptors, immunolocalization in, C226
- α -isoforms of sodium-potassium-ATPase, localization by *in situ* hybridization, C468
- proximal
- folate-binding protein, electron microscopy, C338
 - reabsorption, cellular mechanisms in, C885
- L**
- Lanthanum, calcium channels, thyroid C-cell line, C1253
- Latissimus dorsi muscle
- anterior
 - perpetuation after removal of stress (quail), C400
 - satellite cell activation in (quail), C206 - bioenergetics, during frequency-dependent fatigue, C643
- Lemakalim, slow waves and membrane currents with, colonic smooth muscle, C375
- Length-force relations, active, smooth muscle cells (toad), C1104
- Length-tension relations, skeletal muscle, thin filament length effects, C1060
- Leukocytes, G proteins in, tyrosine phosphorylation and oxygen consumption induced by, C1019
- Lipids
- cellular, composition, endothelial cells, C43
 - metabolism, myocardial, α -adrenergic regulation, C635
 - order, ocular lens membrane, C731
- Lipoprotein, low-density, endothelial cells, C43
- Liver
- fat-storing cells, mitogenic signals for platelet-derived growth factor isoforms, C485
 - sodium-hydrogen exchange in, diabetes effects, C167
 - transgenic, ATP, phosphocreatine protection from fructose load, C1191
 - WB cell pairs, multiple gap junction channel types in, C513
- Liver cell line, cycloheximide induction, sodium-potassium-ATPase subunit mRNAs, C417
- LLC-PK₁ cells, mutant, apical membrane vesicles from, sodium-hydrogen antiporter activity in, C738
- Luciferin-luciferase, luminescence of, intracellular ATP levels and, C176
- Lysophosphatidylcholine, sodium-calcium exchange and, cardiac sarcolemma, C433
- M**
- Macromolecular conjugates, transport inhibitors, anion transport proteins, C1094
- Magnesium
- contractions induced by, vascular smooth muscle (swine), C1224
 - homeostasis, epidermal growth factor effects, myocytes, C1158
- MDCK cells
- sodium-hydrogen exchanger, C868
 - volume regulation, mercurials and, C113

- Membrane
- apical
 - conductances, TBM cell line, C1172
 - parietal cells, histamine-induced chloride channels in, C1000
 - sodium-hydrogen antiporter activity, mutant LLC-PK₁ cells, C738 - basolateral, conductances, TBM cell line, C1172
 - fluidity, endothelial cells, low-density lipoprotein effects, C43
 - plasma, fluidity, collecting tubules, C1
- Mercurials, cell volume regulation and, MDCK cells, C113
- Mesangial cells, cytosolic pH of, regulation by prostaglandin and thromboxane, mesangial cells, C159
- α -(Methylamino)isobutyrate, transport, prolonged incubation of skeletal muscle, C88
- 2-(Methylamino)isobutyric acid, transport systems A and ASC, expression during erythroleukemia cell differentiation, C392
- N-Methyl-D-aspartate, dual effect, suprachiasmatic neurons, C213
- 3-O-Methylglucose, transport, calcium effects, skeletal muscle, C555
- Microinjection, protein, living cells, C355
- Microscopy
- electron, kidney folate-binding protein, C338
 - fluorescence, epithelial monolayers, C868
 - immunoelectron, isoactin localization, smooth muscle thin filaments, C1332
- Microtubules, disruption of, polarity of basement membrane proteoglycan secretion in epithelial cells, C691
- Mineralocorticoids, receptors: *see* Receptors
- Miniglucagon, glucagon processing and, heart (chick), C993
- Mitogenesis, PDGF-induced DNA synthesis, smooth muscle cells, C721
- Models, sublingual gland, glandular mucous cell secretion, C1233
- Monoclonal anti-amiloride antibodies, restricted epitopes defined by, C271
- Monoclonal antibodies
- changes detected by, fibrinogen absorbed in polymer surfaces, C965
 - gluco- and mineralocorticoid receptors, immunolocalization in kidney, C226
- Monocytes, binding, endothelial cells, low-density lipoprotein effects, C43
- Mononuclear cells, attachment, endothelial cells, low-density lipoprotein effects, C43
- Motility
- ciliary, ANF effects, tracheal epithelium, C201
 - colonic, cromakalim and lemakalim effects, C375
 - gastric, calcium current and cytosolic calcium relations, C1012
- Mucin, secretion, intestinal goblet cells, C183
- Mucous cell, glandular secretion, sublingual gland model, C1233
- Muscle
- denervated, mitochondrial adaptations, C841
 - enlargement, after removal of stress (quail), C400
 - fast-twitch, 10-Hz stimulation and, C832
 - malignant hyperthermia-susceptible, ryanodine receptors in (pig), C58
 - slow- and fast-twitch, suspended, contractile and myosin changes, C528
 - striated, mitochondrial biogenesis of, C266
- Muscle, heart
- contractility, α -adrenergic regulation in protein kinase C, C635
 - contraction and calcium current in, citrate effects, C900
 - hypokalemia effects, sodium-potassium-ATPase α_2 , C958
 - length-dependent activation, divalent cations, C609
 - malignant hyperthermia-susceptible, ryanodine receptors in (pig), C58
- Muscle, skeletal
- bioenergetics, during frequency-dependent fatigue, C643
 - force in, hypercapnic acidosis effects, C805
 - force-sarcomere length relation, thin filament length effects, C1060
 - glucose transport, calcium stimulation of, C555
 - hypertrophy, insulin and IGF-I-induced, C475
 - ion permeability in, hyperkalemic periodic paralysis (horse), C926
 - length-dependent activation, divalent cations, C609
 - neuromuscular adaptations to cross-reinnervation, aging effects, C96
 - prolonged incubation, amino acid transport and, C88
 - red and white, myofilament overlap in (carp), C283, C289
 - RNA in, changes induced by diabetes and insulin, C409
 - stretched, myosin isoform mRNA expression and (chicken), C1325
- Muscle, smooth
- calcium release and sensitization, calcium channel blockers and, C364
 - colonic, slow waves and membrane currents, cromakalim and lemakalim effects, C375
 - gastric, cytosolic calcium and membrane potential measurement in, C917
 - hypertrophy, contractile and cytoskeletal protein in, C1085
 - thin filaments, isoactin localization in, C1332
 - uterine, sodium current changes in pregnancy, C658
- vascular
- magnesium-induced contractions (swine), C1224
 - sarcolemmal vesicles, chloride-bicarbonate exchange in, C347
- Muscle cells
- myometrial smooth, gestational changes in sodium current, C658
 - renal cortical vascular, ANF receptors in, C424
 - smooth
 - DNA synthesis, tyrphostins and, C721
 - gastric, calcium current and cytosolic calcium in, C1012
 - length vs. active force relations (toad), C1104
 - vas deferens, calcium current reduction (guinea pig), C17

Muscle cells (continued)

- vascular smooth
 - A7r5, gap junction channels in, C975
 - EIPA-sensitive pH control mechanisms in, C581
 - endothelin signal transduction cascade, C982
 - isoproterenol regulation of calcium mobilization, C492
 - regulation of sodium-hydrogen exchange, C562
 - shortening velocity, calcium dependence in, C449
- Muscle fiber
 - perpetuation, after removal of stress (quail), C400
 - red and white, myofilament overlap, swimming (carp), C289
 - type, neuromuscular adaptations, aging and, C96
- Myocytes: *see also* Cardiomyocytes; Heart cells; Myocytes
 - α -adrenergic regulation, phosphoinositide metabolism and protein kinase C, C635
 - aortic, vasoactive agents and potassium-chloride-induced depolarization, C151
 - atrial
 - ATP-induced changes, C673
 - isometric contractions, cadmium block of, C249
 - atrial and ventricular, cell volume of, ANF effects, C681
 - BC₃H1, extracellular pH in, protein synthesis and, C277
 - colonic, cromakalim and lemakalim effects, C375
 - magnesium homeostasis in, epidermal growth factor effects, C1158
 - renovascular hypertensive, altered calcium dynamics in, C327
 - response, prolonged hypoxia and reoxygenation, C383
 - sodium, inorganic phosphate, and calcium transport, extracellular ATP activation of, C1182
 - ventricular, cellular volume regulation in, C122
- Myofibers, skeletal, hypertrophy, insulin and IGF-I-induced, C475
- Myofilament, overlap, red and white muscle (carp), C283, C289
- Myometrium
 - response, cGMP, C861
 - smooth muscle cells, sodium current changes in pregnancy, C658
- Myosin, hypertrophy and its reversal, smooth muscle, C1085
- Myosin ATPase, changes, suspended muscle, C528
- Myosin isoform, mRNA expression, stretched skeletal muscle (chicken), C1325
- Myosin light chain
 - phosphorylation
 - cGMP effects on myometrial response, C861
 - magnesium-induced contractions (swine), C1224

N

Neurons

- cGMP levels, angiotensin II effects, brain, C79

- nucleus solitarii, γ -aminobutyric acid-induced response in, C745
- suprachiasmatic, glycine effects, C213
- Neutrophils
 - anion exchange in, internal alkalization, C132
 - G proteins in, tyrosine phosphorylation and oxygen consumption induced by, C1019
- Nicotinic current, secretory response, chromaffin cells, C851
- Nitric oxide, exogenous and endogenous, mitochondrial respiration and, hepatocytes, C910
- Nitrotriatic acid, decrease in contraction and calcium current with, cardiac muscle, C900
- Norepinephrine
 - barrier function and, endothelial cell monolayers, C1052
 - calcium current reduction, smooth muscle cells, vas deferens (guinea pig), C17
- Nuclear magnetic resonance, phosphorus-31, force in skeletal muscle, C805
- Nucleus tractus solitarius, neurons, γ -aminobutyric acid-induced response in, C745

O

- Ocular lens, membranous, calcium transport, calcium-ATPase, and lipid order, C731
- Okadaic acid
 - potassium chloride transport and, erythrocytes, C178
 - regulation, chloride channels (shark), C1217
- Oncogenes, potassium current, calcium-activated, C104
- Oocytes
 - water and urea permeability, urinary bladder (toad), C26
 - Xenopus laevis*
 - cAMP-activated chloride channels in, C664
 - intracellular pressure measurement, C652
- Osmolytes, organic, volume regulatory inositol accumulation, C784
- Osteoclast, ruffled membrane, passive chloride permeability charge, C1315
- Ouabain
 - cell volume regulation and, ventricular myocytes, C122
 - palytoxin effects and, LLC-PK₁ renal epithelia, C1201
 - rubidium transport, sodium-potassium pump and, adherent cells, C1341
- Oxidative enzymes, mitochondrial adaptations, denervated muscle, C841
- Oxidative metabolism, skin epithelium, ionic acclimation and (toad), C1117
- Oxidoreductase, mitochondrial function and, hepatocytes, C910
- Oxygen
 - consumption
 - sodium-potassium pump and, colonocytes, C626
 - tyrosine phosphorylation and, neutrophils, C1019
 - measurements, mammalian tissue, C1131

- partial pressure, free intracellular adenosine and, cardiomyocytes, C708
- uptake, skin epithelium (toad), C1117

P

- Palytoxin, apical vs. basolateral, LLC-PK₁ renal epithelia, C1201
- Pancreatic acinar cells, whole cell current analysis, C934, C949
- Pancreatic cells, β -, response to glucose, TGF- β and, C1046
- Papain, shortening velocity, arterial smooth muscle cells, C449
- Paralysis, hyperkalemic periodic, altered ionic permeability, skeletal muscle (horse), C926
- Parietal cells
 - apical membrane, histamine-induced chloride channels, C1000
 - gastric, calcium oscillations in, C67
- Parotid cells, amylase release, sodium fluoride-induced, C194
- PDGF: *see* Platelet-derived growth factor
- Pentobarbital, response induced by, nucleus solitarii neurons, C745
- Peptides
 - bombesin-like, potassium conductance and, fibroblasts, C701
 - receptor-activated membrane currents and, pancreatic acinar cells, C949
 - vasoactive intestinal, potassium and chloride secretion, colon (pig), C750
- Permeability
 - anions, mercurials and, MDCK cells, C113
 - calcium, cardiac sarcolemma, C433
 - chloride, coupled to hydrogen-ATPase, osteoclast, C1315
 - ionic, hyperkalemic periodic paralysis, skeletal muscle (horse), C926
 - norepinephrine and iloprost effects, endothelial cell monolayers, C1052
 - sodium
 - cardiac sarcolemma, C433
 - vasopressin and cAMP effects, renal, C1071
 - water, vasopressin-sensitive, collecting tubules, C1
 - water and urea, oocytes (toad), C26
- pH
 - carbonic acid, first dissociation constant for, C113
 - control mechanisms, EIPA-sensitive, vascular smooth muscle cell growth and, C581
 - cytoplasmic, gap junction sensitivity to, C1028, C1039
 - cytosolic, regulation by prostaglandin and thromboxane, mesangial cells, C159
 - dependence, chromaffin cells, C851
 - extracellular, protein synthesis abnormalities and, C277
 - force and, skeletal muscle, C805
 - intracellular
 - diabetes effects, hepatocytes, C167
 - LLC-PK₁ vesicles, C738
 - MDCK sodium-hydrogen exchanger, epithelial monolayers, C868
 - protein kinase C and, vascular smooth muscle cells, C562
 - regulation, corneal epithelium, C618
 - simultaneous measurement of calcium, C297

- sodium-hydrogen exchanger, inner medullary collecting duct, C1300
 regulation of transport, neutrophils, C132
 skin epithelium, ionic acclimation and (toad), C1117
Pheochromocytoma cells, calcium channels, inhibition by α_2 -adrenergic and muscarinic receptors, C1282
Phloretin, urea transport and, mutant red blood cells, C778
Phorbol esters
 inhibition, intestinal brush-border sodium-proton exchange (chicken), C1264
 modulation of G proteins, hepatocytes, C259
Phorbol myristate acetate, modulation of G proteins, hepatocytes, C259
Phosphate
 diprotinated, force in skeletal muscle, C805
 inorganic
 extracellular ATP activation of, myocytes, C1182
 proximal tubular reabsorption of, C885
Phosphocreatine, protection, ATP, transgenic liver expressing creatine kinase, C1191
Phosphodiesterase, angiotensin II effects on cGMP and, neuronal cultures, brain, C79
Phosphoinositide, metabolism, α -adrenergic regulation of, cardiac myocytes, C635
Phospholipase C, activation, liver fat-storing cells, C485
Phospholipids, membrane, sodium-calcium exchange and, cardiac sarcolemma, C433
Planar lipid bilayers, chloride channels in, protein phosphatase regulation (shark), C1217
Plantaris muscle, contractile and biochemical properties, after hindlimb suspension, C528
Platelet-derived growth factor
 DNA synthesis induced by, tyrphostins and, smooth muscle cells, C721
 mitogenic signals for, liver fat-storing cells, C485
Platelets, α -granule release, ionized calcium release and, C242
Polarity
 epithelial, sodium-hydrogen exchanger, inner medullary collecting duct, C1300
 renal epithelia, palytoxin effects, C1201
Polyalkyl methacrylate polymers, fibrinogen absorbed in, antibody-detectable changes, C965
Polymers, β -cell replication and, C1046
Polymer surfaces, fibrinogen absorbed in, antibody-detectable changes, C965
Potassium
 conductance, calcium-activated, bombesin-like peptide effects, fibroblasts, C701
 depletion, hypokalemia effects, heart, muscle, brain, C958
 efflux, calcium-activated, HT-29 cells, C35
 membrane conductances, TBM cell line, C1172
 transport
 chloride-dependent, erythrocytes, C589
 volume-sensitive, erythrocytes, C178
Potassium chloride
 cotransport
 erythrocytes, anion modulation of (sheep), C503
 protein phosphatase and, erythrocytes, C178
 depolarization induced by, aortic smooth muscle myocytes, C151
 swelling-activated, vanadate and fluoride effects, C308
Potassium current
 calcium-activated, *ras*-transformed fibroblasts, C104
 calcium oscillations, carbachol-induced, C598
 whole cell current analysis, pancreatic acinar AR42J cells, C934
Potassium-hydrogen exchange, corneal epithelium, C618
Potentials
 membrane
 conductances, TBM cell line, C1172
 cytosolic calcium and tension measurement, intact smooth muscles, C917
 endothelin signal, C982
 sodium-dependent succinate transport, intestine (chick), C1151
 phosphorylation, 10-Hz stimulation, fast-twitch muscle, C832
 reverse, receptor-activated current, pancreatic acinar cells, C949
Pregnancy, sodium current changes, myometrial smooth muscle cells, C658
Pressure
 intracellular, direct measurement of, C652
 oxygen, free intracellular adenosine and, cardiomyocytes, C708
Prostaglandin F₂, regulation, cytosolic pH, mesangial cells, C159
Protein
 anion transport, topography of, C1094
 contractile and cytoskeletal, hypertrophied smooth muscle, C1085
 cytoskeletal, analogue of, urinary bladder epithelial cells (toad), C1308
 degradation, thyroxine-induced left ventricular hypertrophy, C316
 electroinjection into living cells, C355
 guanosine nucleotide-binding, modulation of calcium channels, PC-12 cells, C1282
 phosphorylation, proximal tubular reabsorption of inorganic phosphate, C885
 regulatory, voltage gating of VDAC, C371
 synthesis
 abnormalities, extracellular pH and, C277
 insulin and IGF-I effects, skeletal myofibers, C475
 intracellular pH and, vascular smooth muscle cells, C581
 targeting, apical localization in epithelial cells, C715
Protein kinase, cAMP-dependent, renal epithelial cell properties, C1290
Protein kinase C
 α -adrenergic regulation, cardiac myocytes, C635
 inhibition, intestinal brush-border sodium-proton exchange (chicken), C1264
 potassium efflux and, HT-29 cells, C35
 sodium-hydrogen exchange and, vascular smooth muscle cells, C562
 stimulation, calcium ion influx, C1273
Protein kinase II, calcium/calmodulin-dependent, chloride conductance and, T84 cells, C877
Protein phosphatase
 potassium chloride transport and, erythrocytes, C178
 regulation, epithelial chloride channels (shark), C1217
Protein-tyrosine kinase, PDGF, inhibition of, smooth muscle cells, C721
Proteoglycan, basement membrane, epithelial cells, disruption of microtubules and, C691
Pump
 calcium, ocular lens membranes, C731
 proton, passive chloride permeability charge, C1315
 sodium, hypokalemia effects, heart, muscle, brain, C958
 sodium-potassium
 cardiac cell volume and, C122
 colonocytes, C626
 stoichiometry, adherent cells, C1341
Purine nucleotide cycle, metabolic responses, 10-Hz stimulation, fast-twitch muscle, C832
- Q**
- Quinacrine**, block, contractions, atrial cells, C249
- R**
- Receptors**
 adenosine, medullary thick limb cells, C143
 α_2 -adrenergic and muscarinic, calcium channel inhibition via, PC-12 cells, C1282
ANF, renal cortical vascular smooth muscle cells, C424
 cell surface, epidermal growth factor, hepatocytes, C457
 gluco-, immunolocalization, kidney, C226
 mineralocorticoid, immunolocalization, kidney, C226
 muscarinic cholinergic
 glandular mucous cell secretion, C1233
 HT-29 cells, C35
 P₂-purinergic, atrial myocytes, C673
 ryanodine, malignant hyperthermia-susceptible muscles (pig), C58
Rectal gland
 cells
 chloride ion secretion in (shark), C813, C824
 chloride secretion, atriopeptin effects (shark), C1125
 epithelial chloride channels, regulation by protein phosphatase (shark), C1217
Red blood cells: see Erythrocytes
Reinnervation, neuromuscular adaptations to, aging and, C96
Reoxygenation, prolonged hypoxia and, cardiac myocyte response to, adult, C383

- Respiration, mitochondrial, nitric oxide effects, hepatocytes, C910
- Rhythms, circadian, glycine effects, suprachiasmatic neurons, C213
- Ribonucleic acid
messenger, expression, urinary bladder (toad), C26
muscle, changes induced by diabetes and insulin, C409
- Rubidium
transport
adherent cells, C1341
volume and, high-potassium erythrocytes, C589
- Ryanodine
primary action of
calcium release and, coronary artery smooth muscle cells (cow), C763
calcium release and, coronary smooth muscle cells (pig), C771
receptors: *see* Receptors

S

- Salivary gland
amylase release, sodium fluoride-induced, C194
sublingual, glandular mucous cell secretion, C1233
- Sarcolemma
cardiac, sodium-calcium exchangers, C1212
sodium-calcium exchange, lysophosphatidylcholine and, C433
- Sarcolemmal vesicles, chloride-bicarbonate exchange in, vascular smooth muscle, C347
- Sarcomere, length changes, swimming (carp), C289
- Sarcoplasmic reticulum
ANP secretion, calcium ion dependence of, C756
calcium release and sensitization, calcium channel blockers and, C364
smooth muscle cells
endothelin effects on calcium release (pig), C771
endothelin effects on calcium release (cow), C763
- Satellite cells, activation, anterior latissimus dorsi muscle (quail), C206
- Sepsis, tricarboxylic acid cycle and, heart, C50
- Sinus gland, gap junction sensitivity, humoral control of, C1028, C1039
- Skin, epithelium, oxygen uptake of (toad), C1117
- SNARF-1, simultaneous measurement, intracellular pH and calcium, C297
- Sodium
chloride-bicarbonate exchange dependent on, sarcolemmal vesicles, vascular smooth muscle, C347
extracellular ATP activation of, myocytes, C1182
increased activity, apical membrane vesicles, LLC-PK₁ cells, C738
influx, vascular smooth muscle cells, C562
membrane conductances, TBM cell line, C1172
prolonged hypoxia and reoxygenation, cardiac myocyte response to, adult, C383
succinate transport dependent on, intestinal cells (chick), C1151
sugar transport coupled to, HT-29 cells, C1245
- Sodium-calcium exchange
cadmium and contractions, atrial cells, C249
lysophosphatidylcholine and, cardiac sarcolemma, C433
rod outer segments, cardiac sarcolemma and, C1212
volume regulation and, high-potassium erythrocytes, C589
- Sodium-calcium ion exchange, diabetes-induced defects, heart, C1165
- Sodium channel
apical, cGMP stimulation of, urinary bladder (toad), C234
epithelial, distinct epitopes of amiloride, C271
gestational changes, myometrial smooth muscle cells, C658
single amiloride-blockable, vasopressin and cAMP effects, C1071
- Sodium-chloride cotransport, cardiac cell volume and, C122
- Sodium current, whole cell current analysis, pancreatic acinar AR42J cells, C934
- Sodium fluoride, amylase release induced by, parotid cells, C194
- Sodium-hydrogen exchange
diabetes effects, hepatocytes, C167
extracellular pH and, vascular smooth muscle cells, C581
increased activity, apical membrane vesicles, LLC-PK₁ cells, C738
inner medullary collecting duct, C1300
long-term regulation, vascular smooth muscle cells, C562
MDCK, imaging, C868
mitochondrial biogenesis, striated muscle, C266
- Sodium-potassium-ATPase
 α -isoforms of, localization in kidney, C468
palytoxin effects and, LLC-PK₁ renal epithelia, C1201
subunit mRNAs, induction by cycloheximide, liver cell line, C417
- Sodium-potassium-chloride cotransport, bumetanide binding, kidney membrane, C791
- Sodium-proton exchange, intestinal brush-border, phorbol ester inhibition of (chicken), C1264
- Soleus muscle, contractile and biochemical properties, after hindlimb suspension, C528
- Spectroscopy
oxygen levels, mammalian tissue, C1131
phosphorus nuclear magnetic resonance, frequency-dependent muscle fatigue, C643
- Strontium, length-dependent activation by, cardiac and skeletal muscle, C609
- Structure-activity relations, uncoupling, fatty acids, cardiac cells, C439
- Sublingual gland, glandular mucous cell secretion, model, C1233
- Succinate, transport, sodium-dependent, intestinal cells (chick), C1151
- Sugar, transport, sodium-coupled, HT-29 cells, C1245
- Sulphydryl agents, cell volume regulation and, MDCK cells, C113
- Superoxide, G proteins and, neutrophils, C1019

- Superoxide dismutase, endothelial activity, EDRF release and, C219
- Suprachiasmatic nucleus, glycine dual effects, C213
- Swelling, osmotic, intracellular pressure measurement, C652
- Swiss 3T3 cells, calcium-activated potassium conductance, bombesin-like peptide effects, C701

T

- TBM cells, membrane conductances in, C1172
- Tetrodotoxin, hyperkalemic periodic paralysis and, skeletal muscle (horse), C926
- TGF- β : *see* Transforming growth factor- β
- Thapsigargin, stimulation, calcium ion influx, C1273
- Thionicotinamide, urea transport and, mutant red blood cells, C778
- Threonine, transport systems A and ASC, expression during erythroleukemia cell differentiation, C392
- Thromboxane A₂, regulation, cytosolic pH, mesangial cells, C159
- Thy-1, signals, apical localization in epithelial cells, C715
- Thyroid C-cell line, multiple calcium currents in, C1253
- Thyroxine, left ventricular hypertrophy induced by, collagen turnover and, C316
- Tissue: *see also* specific type
oxygen levels, mammalian, C1131
- Trachea, epithelium, ciliary motility in, ANF inhibition of, C201
- Transforming growth factor- β , insulin secretion and, pancreatic β -cell response to glucose, C1046
- Tricarboxylic acid, cycle, sepsis effects, heart, C50
- Tumor necrosis factor- α , mitochondrial function and, hepatocytes, C910
- Tyrosine, phosphorylation, oxygen consumption and, neutrophils, C1019
- Tyrophostins, PDGF-induced DNA synthesis, smooth muscle cells, C721

U

- Unitary conductance, gap junction channel characterization, A7r5 vascular smooth muscle cells, C975
- Urea, transport deficiency, mutant red blood cells, C778
- Urinary bladder
epithelial cells, F-actin, vasopressin depolymerization of (toad), C9
mRNA expression from, oocytes (toad), C26
proteins in smooth muscle during hypertrophy, C1085
sodium and cation channels in, cGMP stimulation of (toad), C234

V

- Vanadate, potassium-chloride cotransport and, C308
- Vasoactive agents, depolarization induced by, aortic smooth muscle myocytes, C151
- Vasopressin: *see also* Antidiuretic hormone
cAMP and, single amiloride-blockable sodium channels, C1071

depolymerization of F-actin, bladder epithelial cells (toad), C9
 epithelial cell protein 4.1, bladder (toad), C1308
 water transport sensitive to, kidney collecting tubules, C1
 Verapamil
 block, contractions, atrial cells, C249
 G protein pharmacomechanical coupling, C364
 Voltage clamp, patch-electrode, potassium conductance in fibroblasts, C701
 Voltage gating, mitochondrial outer membrane channel, conserved modulator, C371

Volume
cell

ANF effects, atrial and ventricular myocytes, C681
 regulation, erythrocyte potassium-chloride cotransport (sheep), C503
 regulation, ventricular myocytes, C122
 regulation by mercurials, MDCK cells, C113
 regulation
 cation transporters and, erythrocytes, C589
 inositol accumulation, brain cells, C784

W

Water, transport, vasopressin-sensitive, collecting tubules, C1
 WB cells, distinctive gap junction channel types, liver, C513
 Whole cell current, analysis, pancreatic acinar AR42J cells, C934, C949

Y

Yttrium, calcium channels, thyroid C-cell line, C1253
